

# BELGIUM - WALLONIA

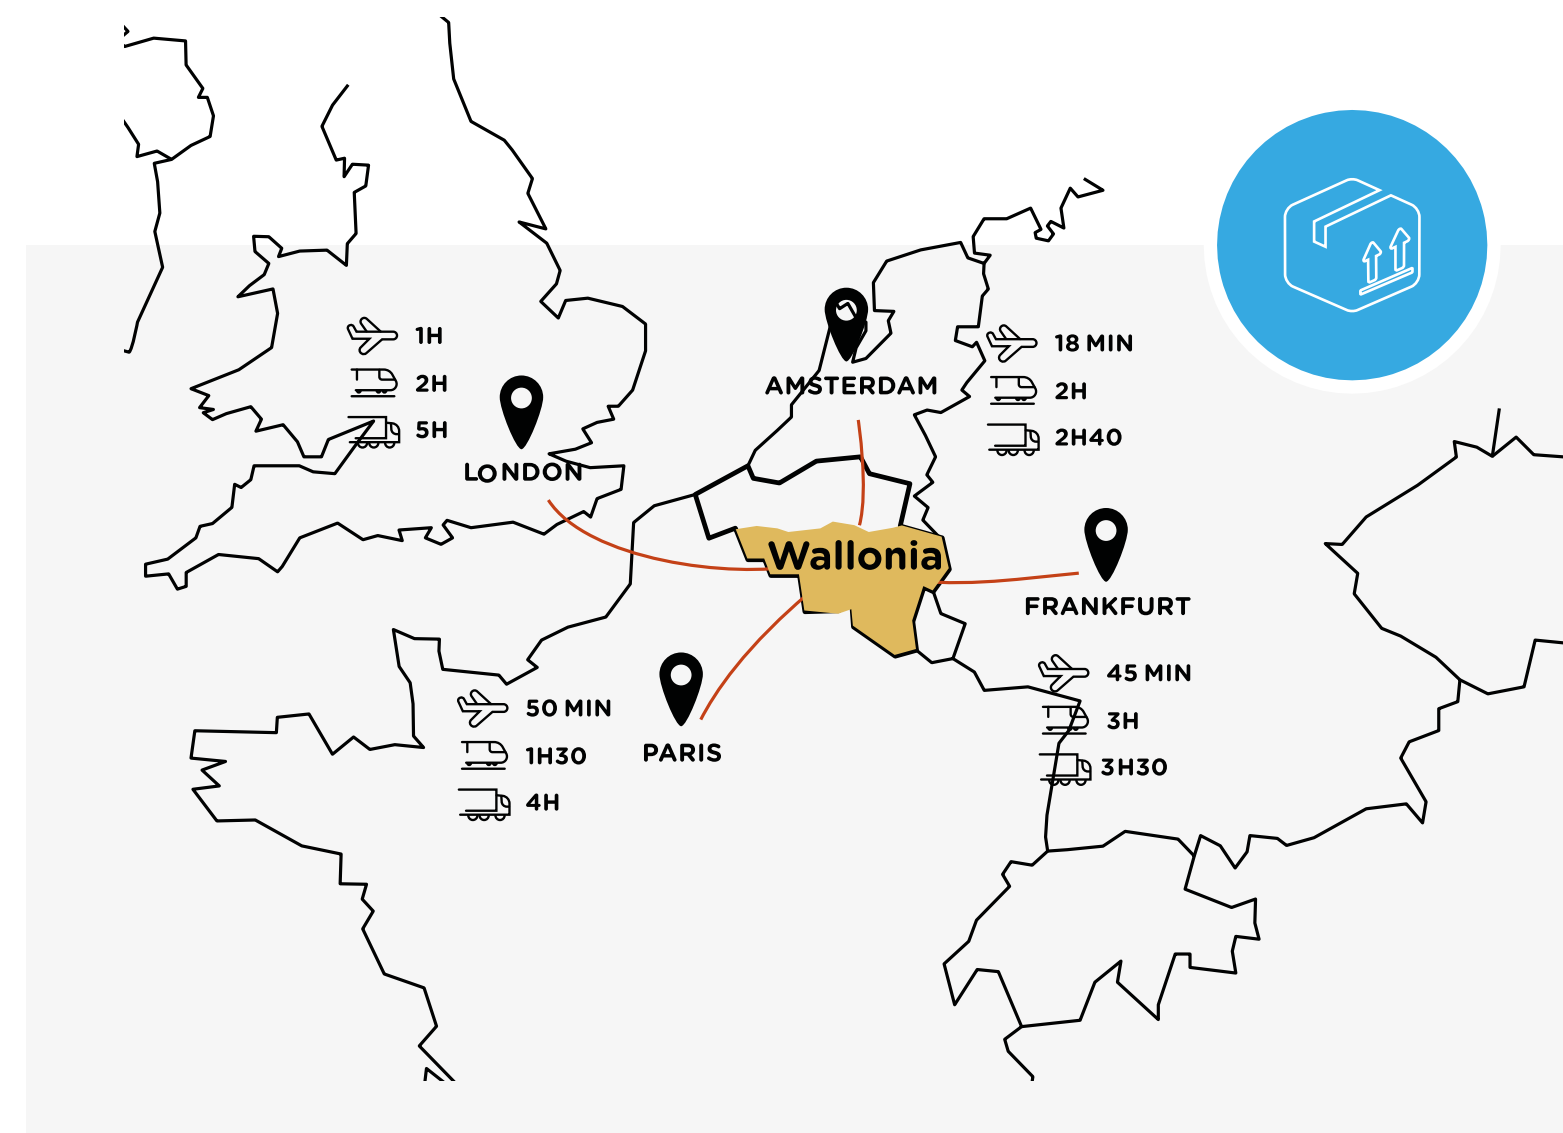

@ ARAB HEALTH 2024

Wallonia.be

January 29th - February 1st 2024

DUBAI WORLD TRADE CENTRE

Wallonia has an excellent logistics infrastructure and «multimodality» is the keyword. **Liege Airport** was awarded the title of **best cargo airport in the world** for the year 2020. You will also find yourself well supported : the actors of the Life sciences sector are gathered in the BLOWIN cluster.

# WALLONIA EXPORT & INVESTMENT AGENCY

The Wallonia Export & Investment Agency (AWEX) is the institution in charge of the development and management of Wallonia's domestic and international economic relations.

Through a personalized, innovative, and sustainable approach, AWEX supports Walloon companies - regardless of their size, sector, or target market - in every step of their international endeavors. This includes exports, technological partnerships, and development abroad.

The agency's vast network of connections ensures the best advisors are always by your side. Our local anchors and agents abroad are capable of providing unparalleled insight to take your company to the next level. In addition, our connections will help establish your business in the global marketplace and promote it throughout the world. Training, incentives, and international financing are also available.

AWEX is also committed to strengthening Wallonia's position as the premier gateway for international investors seeking success in the heart of Europe. We work closely with them to inform, convince, and advise in every stage of their development.

Feel free to get in touch with one of our local or international agents via our websites listed above.

In our network of more than 400 employees in nearly 100 countries around the world, there is always someone ready and willing to support you in your approach.

# BIOWIN

## About BioWin

BioWin is the health cluster in Wallonia, Belgium, the regional reference for all stakeholders in biotech, e-health and medtech research and innovation projects. It includes 250 members from the private, public and academic sectors.

Its mission is to accelerate innovation to meet tomorrow's public health challenges and develop the knowledge, employment and competitiveness of the life sciences ecosystem in Wallonia.

Founded in 2006, BioWin brings together all the innovation players in Wallonia's health-tech field, with the goal of stimulating regional economic redeployment. The cluster is also involved in implementing the sector's industrial policy (industrial innovation and research, training, and support for business growth).

agnelo@beldimed.com

### COMPANY BACKGROUND

Help people all around the world to have access to quality medicine at a fair price. In a world where differences between populations (richness, social security, insurances) are high, we strongly believe that every human deserves the right to have access to healthcare products at a reasonable price. Beldimed therefore commits itself to focusing on patient health and providing solutions. Our aim is to develop a “win-win” collaboration with different actors such as customers, suppliers, brokers all around the world. We believe in their expertise of the local market and build bridges based on trust.

### ADDED VALUE

By choosing to work with a fully GDP (Good Distribution Practices) partner, you also select a flexible and reliable company with a dedicated team. We will strive to attend to all your needs in an ever-changing world.

Partnerships / Extensive network of suppliers / quality products / Logistics solutions / direct access to manufacturers / very wide range of products / a growing team/ One-stop shop / open to opportunities.

### RANGE OF PRODUCTS

Beldimed has always placed human beings as a priority. That is why our company focuses on delivering human medicines according to challenging requirements.

Unlicensed and shortages products / Narcotics and controlled Drugs / Named patient program / Clinical trials supply.

We are also focusing more and more on veterinary products.

### MAIN REFERENCES

All kind of human and veterinary medicines.

### CERTIFICATIONS

Wholesale distribution authorization (Human and Veterinary Medicines / Narcotics and Psychotropics) and GDP certificate issued by AFMPS/FAGG + EudraGMDP.

### CONTACT

Mr Benoit Ligot - Managing Director  
Mobile: +32 475 48 99 83  
Email: benoit@bellavie.eu

### COMPANY BACKGROUND

BellaVie, a Belgian laboratory founded in 2018 by Benoît Ligot and Olivier Raimond, experienced health scientists with 25 years in the field. They created a unique 100% Belgian supplement range addressing global health issues. Distinguished by a scientific approach, their products stand out in the market. The lab rapidly expanded globally, collaborating with over 20 countries in the world.

### ADDED VALUE

Our innovative Synbioceutical concept  
BellaVie's Synbioceuticals® offer targeted health benefits with 10 billion carefully selected probiotic bacteria and prebiotic fibers. Enriched with synergistic nutraceuticals, they provide a natural alternative to medication, restoring microbiota balance and supporting physiological functions for superior health benefits.

### RANGE OF PRODUCTS

An innovative and unique range.

- BellaVie Immuno: for the improvement of the immune system;
- BellaVie Cholesterol: for the management of total cholesterol;
- BellaVie Woman: for the management of vaginal flora;
- BellaVie Children: for infectious diseases of children;
- BellaVie Gluco: for the management of type 2 diabetes and overweight;
- BellaVie Stress: for the management of stress and anxiety.

### MAIN REFERENCES

We have signed contracts in more than 20 countries around the world and we currently sell in more than 10 countries.

### CERTIFICATIONS

BellaVie is certified to GMP, ISO 22000 and HACCP standards, guaranteeing that its products meet the highest standards of quality and food safety.

### ADDED VALUE

Masana is suitable for all types of use cases for any follow-up.

The ecosystem consists of a cross-disciplinary, multi-disciplinary and multi-organisation web platform and a mobile application!

The patient-partner feeds his file with medical information and non-medical, while providers optimize and adapt the intake in charge of the patient according to his state of health and their needs, for a complete view of the information in the same place.

### RANGE OF PRODUCTS

Our ecosystem is composed of a mobile application dedicated for the patient and a web portal platform for professionals. Our ecosystem has integrated third parties to exchange medical parameters collected from a complete range of certified connected medical tools.

Come and visit us to know more about us and our product!

### MAIN REFERENCES

Our solution is available in 15 Clinics in Dubai.

We monitor heart failure, lung failure, diabetes, high risk pregnancy, covid-19, bariatric post-hospitalisation, elderly, etc. These projects of monitoring have been deployed within hospitals, coordination centres and teleassistance ones.

### CERTIFICATIONS

mario.compagnone@medestime.com

### COMPANY BACKGROUND

Medestime is a company created in 1991 and established in Belgium. We are the designer, manufacturer and seller of the Bilicrystal® and Bilidoll® phototherapy systems. Our devices are intended for the treatment of physiological or acute jaundice, in the population of full-term or preterm newborn babies (2-3 days after birth).

### ADDED VALUE

Our devices help to treat all cases of hyperbilirubinemia in a very short amount of time. Therefore they help avoiding serious brain damages to the patient. They, also, avoid the need to resort to systematic exsanguinous-transfusion.

### RANGE OF PRODUCTS

The Bilicrystal® IV.3, the Bilicrystal® MONO.3, the Bilicrystal® DUO.3, the Bilicrystal® TRANS.3 and the Bilidoll® ELB.

### MAIN REFERENCES

90% of Belgian hospitals use our devices.

### CERTIFICATIONS

In the process of being certified in accordance with regulations MDR 2017/745.

### CONTACT

Mr Nicolas Fautré, CRO  
nf@mintt.care

### COMPANY BACKGROUND

Mintt's leadership, with extensive experience in large-scale ultra-tech management, is complemented by a scientific committee of medical experts. The diverse Mintt team, versed in engineering and AI, enables a holistic approach to fall prevention, staying ahead in rigorous medical tech and AI. Our solutions, rooted in the latest research, affirm our leadership in fall detection and prevention through the fusion of advanced technology, scientific acumen, and a knowledgeable team.

### ADDED VALUE

Our fall detection and prevention system help elderly people access better healthcare and greater independence by alerting medical staff precisely in real time to any fall, or risk of fall, and enabling them to take action to prevent any recurrence. In fact, we offer comprehensive fall analyses, enabling medical staff to implement a prevention campaign and reduce the risk of falls.

### RANGE OF PRODUCTS

Our fall detection AI employs 3D sensors and algorithms for non-intrusive analysis, alerting medical staff in real time. Prevention involves pseudonymized fall sequence analysis, adapting treatments. The sensor automates fall tracking, easing quality of care monitoring. Our hardware-based software is scalable and IoT-enabled, seamlessly integrating with digital solutions (patient records, alert systems, etc.).

### MAIN REFERENCES

In Brussels, Chirec, Saint-Luc, and Erasme hospitals are equipped and satisfied with our sensors. In Flemish Brabant, the Hof ten Doenberghe care center collaborates excellently with 91 installed sensors, providing reassurance to residents and staff. Our collaboration with the Jolimont Group includes 10 sensors in Les Buissonnets nursing home, with plans to extend to their 7 homes, enhancing patient safety and satisfaction.

### COMPANY BACKGROUND

OneLife is a Belgian biotech company specialized in the development and production of HIGH-TECH enzymatic detergents used in medical applications. OneLife is the reference in Belgium for high level cleaning of medical endoscopes and surgical instruments.

### ADDED VALUE

Our unique formulations have proven to have an outstanding performance in dissolving biofilms on surfaces and hollow instruments. We believe to have a key technology that can contribute to the fight against MRSA and nosocomial infections in the hospital environment. Our technology is also considered as green and durable.

### RANGE OF PRODUCTS

Our unique portfolio exists of 3 types of products.

1. Detect: tools and technology to detect contamination or organic residue on surgical instruments
2. Cure: Once detection is done, we can reset the instruments to a clean state ready for proper disinfection
3. Prevent: Efficient cleaners will prevent biofilms to form and organic residue to remain on the instruments. These cleaners are for daily use.

### MAIN REFERENCES

Several university hospitals in Belgium are using our product range as standard procedures especially in endoscopy.

### CONTACT

Mr Laurent Desseaux - Export & Marketing Manager  
+32 476 680 648  
laurent@papermints.be

### COMPANY BACKGROUND

PaperMints®, located near Brussels in Belgium, offers since 2003 items which are unique in the world. The PaperMints® are food products and generally sold as impulse over-the-counter products in more than 60 countries.

These are NOT drugs, but unique breath fresheners for consumers.

- Who have bad breath (halitosis);
- Smokers ;
- After a meal or drink.

We believe that pharmacies or «impulse» shops such as kiosks and petrol stations are the best distribution channels.

### ADDED VALUE

PaperMints® is successful in 60 Countries in Europe, Middle East and Africa.

### RANGE OF PRODUCTS

www.papermints.be offers 3 concepts:

- 1) PaperMints CoolCaps: a unique worldwide patented product that produces a strong fresh breath in the mouth ... AND in the stomach.
- 2) PaperMints: Mint leaves can be compared to Pfizer's Listerine strips, but PaperMints are the 'ORIGINALS', have a better taste and are more efficient for bad breath.
- 3) Mouth Spray with 200 oral sprays: ideal solution for bad breath during the day.

One simple spray is enough. With its size of a credit card, you can take it with you anywhere. Without alcohol or sugar, the mint flavors being contained in a liquid, they are immediately released, without having to be chewed or sucked.
