## WALLONIA EXPORT & INVESTMENT AGENCY

The Wallonia Export & Investment Agency (AWEX) is the institution in charge of the development and management of Wallonia's domestic and international economic relations.

Through a personalized, innovative, and sustainable approach, AWEX supports Walloon companies - regardless of their size, sector, or target market - in every step of their international endeavors. This includes exports, technological partnerships, and development abroad.

The agency's vast network of connections ensures the best advisors are always by your side. Our local anchors and agents abroad are capable of providing unparalleled insight to take your company to the next level. In addition, our connections will help establish your business in the global marketplace and promote it throughout the world. Training, incentives, and international financing are also available.

AWEX is also committed to strengthening Wallonia's position as the premier gateway for international investors seeking success in the heart of Europe. We work closely with them to inform, convince, and advise in every stage of their development.

Feel free to get in touch with one of our local or international agents via our websites listed above.

In our network of more than 400 employees in nearly 100 countries around the world, there is always someone ready and willing to support you in your approach.

## FLANDERS INVESTMENT & TRADE AGENCY

Flanders Investment & Trade agency promotes sustainable international business, in the interest of both Flanders-based companies and overseas enterprises.

Whatever sector you are involved in, Flanders Investment & Trade will help you establish contact with the Flemish companies you are looking for.

This includes not only products or services you may be sourcing, but also various types of business relationships, from joint ventures to technology transfers.

At another level Flanders Investment & Trade enhances Flanders' position as the gateway to Europe for inward investors. The Agency identifies, informs, advises and supports overseas enterprises by establishing production and research facilities, contact centers, headquarters, logistics operations and the like in Flanders, the northern region of Belgium.

This broad focus on international entrepreneurship, involving outward trade as well as inward investments, requires not only a thorough knowledge of Flemish economy, but also an extensive network outside of Flanders. We have just that for you. Do visit our website and discover our worldwide network.

Koning Albert II-laan 37 - 1030 Brussels

#### COMPANY BACKGROUND

More than 35 years ago, Claude Buzon revolutionized the world of pedestal support systems by founding Buzon Pedestal International and its innovative pedestals for the beautification of outdoor spaces. Today, the company is managed by his son, Laurent Buzon, who is doing everything possible to perpetuate the work accomplished.

#### ADDED VALUE

Buzon® pedestals offer simple, effective and durable solutions for all types of terraces and outdoor spaces (from 15 to 955 mm). All our development efforts are focused on perfecting our systems, anticipating new demands and constantly improving our support to users. All this while respecting our values of respect for the environment.

#### RANGE OF PRODUCTS

Buzon® manufactures and distributes adjustable pedestals for the construction of terraces. The pedestals are strong, stable and flexible, allowing the use of multiple terrace coverings with the same pedestal model. They are reinforced by a wide range of specific solutions to meet all demands. Europe is currently its main market, but the products are distributed worldwide.

#### MAIN REFERENCES

Buzon® pedestals can be found all over the world: at the foot of The Shard in London, one of the world's tallest skyscrapers, as well as the Burj Khalifa in Dubai, and also on the balconies of the Petronas Twin Towers in Kuala Lumpur.

#### CERTIFICATIONS

In 2017, Buzon® obtains ISO 9001:2015 certification and becomes CO2 neutral. Birth of the Buzon® nursery in Madagascar with over 31,835 trees planted per year. In 2017, Buzon® acquires ISO 14001 certification. In 2022, Buzon® obtains Cradle to Cradle Certified® Bronze certification.

#### COMPANY BACKGROUND

Founded in 1989, COPRABEL SA is a Belgian company specialized in the production of luxurious decorative products.

COPRABEL is the leading manufacturer and exporter of Metallic Paints, Wood coatings and Universal Colorants, used for both interior and exterior design.

We have concentrated our efforts in the production of our unique metallic paints, EASYCOLOR® Metallic Paints, which come in one-of-a-kind Gold, Silver, Bronze and tailor-made colors. We also provide technical support for the application of our products and supply primers and top-coats compatible with our paints.

Furthermore, we developed an extensive range of quality Wood Stain, sold under our brand NARI®. Our Wood Stain comes in different colors, is UV resistant and is compatible with nitrocellulose lacquers. Our objective is to become a top quality one-stop shop for all the interior and exterior design needs. We use the latest technologies, carefully sourced raw-materials and provide environmentally friendly products.

We are mainly selling our products in Europe, Middle-East and Africa, and have established a branch in Saudi Arabia and in the United Arab Emirates in order to support our growth in these regions.

Coprabel, The Quality in Colors!

## EQUITONE by Europanel NV

### BOOTH 8C352

LinkedIn: <https://www.linkedin.com/company/equitone-export/>

### DELEGATE

Mr Willem Lambrecht, Global Export Sales Director  
Mobile : +32 473 81 76 69  
Email : willem.lambrecht@etexgroup.com

### COMPANY BACKGROUND

EQUITONE Fiber cement is a composite material made of cement reinforced with cellulose fibers. Thin, light, durable and beautiful, it's a unique material that combines great elegance with superior strength. This makes it one of the most widely used sustainable cladding types for ventilated facades worldwide. EQUITONE is a through-coloured facade material designed by and for architects. Discover more on [Equitone.com](http://Equitone.com)

### ADDED VALUE

EQUITONE panels require low maintenance, have a long life expectancy and support lightweight construction, which helps to achieve an overall low carbon footprint of building projects. EQUITONE is the ideal solution for cladding large buildings, but also for covering prestigious villas. Whether for new constructions or renovations, these materials ensure excellent aesthetics, high energy saving, durability, mechanical strength and fire resistance.

### RANGE OF PRODUCTS

EQUITONE is available in different finishes: [linea], [tectiva], [natura], [lunara] and [pictura], with different colours, more than 50 in total. The material, through-coloured, can receive a further coating and show, depending on the treatment, a raw, natural, sanded, smooth, matt or coloured appearance. Façade panel thicknesses range from 8 mm to 12 mm. Common fixing methods are colour-coated rivets for exposed fixing and undercut anchors for concealed fixing.

Email: caroline.zigrand@agc.com

Mr François Snoeck, Product Owner  
Mobile: + 32 498 44 01 14  
Email: Francois.snoeck@agc.com

### COMPANY BACKGROUND

GenieVision is a corporate startup from AGC Glass Europe.

### ADDED VALUE

In the construction industry, the failure cost is about in average 10% of the total budget. The impact on margin is very high, as it is between 1 and 3%. With « GenieVision», those companies can save up to 50% of their failure's costs.

Another parameter is that those companies have invested a lot in 3D BIM design (Hardware, software, people and intelligence) but then when the execution starts, they run it using 2D paper plans. All intelligence by avoiding errors start again by misunderstanding and collaboration issues.

### RANGE OF PRODUCTS

Our solution is a software that brings the 3D investment on-site (on the work site) thanks to Augmented Reality and gives the capability to detect errors in real time.

GenieVision is a 3D BIM based on augmented reality directly on the work site. This technology overlays the real world with the 3D BIM model at scale 1:1.

### COMPANY BACKGROUND

Nelissen Bricks, a Belgian brick manufacturer based in the heart of Belgium, is specialised in the production of hand-moulded bricks and reaches the highest level in terms of quality and colour shades. The innovation that lies within our company and our unwavering commitment to serve all customers are key to our international success. Nowadays, we have become a major player in more than 50 countries, with a yearly turnover of more than 43 million Euro, and manufacturing quantities that exceed 185 million bricks/year. Innovation co-creation and sustainability, some of Nelissen Bricks' core values, are an affirmation of the dedication exhibited by our team in providing a consistently high level of service to our customers.

### ADDED VALUE

Under the motto «innovate today to shape tomorrow», Nelissen offers a wide range of bricks for every style: classic, modern, presbytery or contemporary houses. All of this in more than 100 different colours and 8 different sizes. The Nelissen bricks are suitable for both traditional masonry and modern techniques such as glueing or bricklaying with thin-bed mortar.

### RANGE OF PRODUCTS

Facing bricks, brick slips & corner slips.

### MAIN REFERENCES

Lanaken, Belgium - Genk, Belgium - Maastricht, Netherlands - Vilnius, Litouwen

### CERTIFICATION

Nelissen Bricks considers customer-friendliness and quality of paramount importance. We are driven by our continuous pursuit of maximum customer-friendliness and always put the needs of our customers first. Environment and durability are concepts familiar to Nelissen and the production process at Nelissen is a leading example of this. Nelissen Bricks is ISO 9001 (quality) and ISO 14001 (environment) certified. Bricks produced at the Lanaken production unit comply with BENOR, CE, NL-BSB, GOST-R and Baustoffüberwachung BÜW certification.

#### COMPANY BACKGROUND

Founded in 1946, Dothée specialized in the production of industrial paints. In 2000, the company was taken over by Dr Philippe Rondou who directed the R&D towards innovative water-based technical coatings more respectful of the environment and sold under the RD Coatings brand. This high level of specialization enables the company to export its products worldwide.

#### ADDED VALUE

Our products are mostly one-component, ready-to-use with short drying time and downtime. They are environmentally friendly and have very low VOC levels. They avoid the presence of hazardous products on site and reduce inconvenience and wastage during application. They considerably limit mistakes on jobsites and are very effective over time.

#### RANGE OF PRODUCTS

Anti-corrosion, liquid waterproofing and concrete protection.  
Solutions for: waterproofing and anti-corrosion protection of metallic roofs - waterproofing of bitumen roofs - UV reflective coatings - structural steel - floors - façade restoration

#### COMPANY BACKGROUND

RubberGreen is the specialist of recycled rubber and is active in the design and manufacture of high value added solutions (noise and vibration insulation, mechanical protection, shock absorption, anti slip protection, etc.). We manufacture products for the construction & Building sector as well as products for roof supports systems (HVAC, photovoltaic panels, etc.)

#### ADDED VALUE

RubberGreen is the promoter of a 360° circular economy vision, making it possible to transform rubber waste into noble materials for new high-performance applications. We value responsible management of raw material resources and the use of renewable energy.

#### RANGE OF PRODUCTS

RubberFoot and squarefoot for support applications for industrial systems, Sonic mat and RubberWall range for vibration insulation purposes in buildings.

## COMPANY BACKGROUND

In 1926, Henri Wouters Wouters founded the Workshops. Working alone, he then manufactured parts subcontracted for Air Liquide Seraing. The company grows and diversifies.

In 1979, Jean-Marc Wouters, enters the company of which he became manager in 1986.

The number is then a dozen people. The passage of the 2000, S.A. ESTABLISHMENTS Wouters is ISO 9000 certified.

The quality of its organization and its products enables it to obtain the status of « European Provider » for Air Liquide.

TECNOLUB was created in 1988 by Blaise Raymond. This is initially a lubricant sales office.

In 1989, TECNOLUB develops its first micro-lubrication systems.

This emerging technology continues to evolve in the next decade and the fields of application are increasing: cutting, milling, turning, stamping, rolling, plating layer with precisely controlled weight ...

TECNOLUB reputation grows. In 2006, AIRBUS and BOEING command their first micro-lubrication systems.

Raymond Blaise unfortunately did not have the time to savor his success, he died on 27 October 2008.

In 2013, convinced of the mutual interest of such an operation, the ESTABLISHMENTS WOUTERS integrate the activities of TECNOLUB Studies Office in their service offering to become WOUTERS-TECNOLUB.

## ADDED VALUE

Our low pressure oiling system use a Wouters Tecnolub specific technology that allows our customer to save about 70% of oil in their production process and without any pollution.

## RANGE OF PRODUCTS

Oiling System for the concrete industry.
